

PREETHEESWARI M

Aspiring Data Analyst | AI & Data Science

Email: preetheemari@gmail.com | Phone: 8754625815

Location: Tamil Nadu, India

LinkedIn: Preetheeswari M | GitHub: github.com/preethee117

CAREER OBJECTIVE

Forward-thinking B.Tech AI & Data Science student with practical experience building advanced data-driven automation pipelines and agentic workflows. Proven track record of developing production-grade solutions, including an AI-powered self-healing automation framework using LangGraph and an automated sales reporting pipeline with VBA analytics. Seeking a technical role to apply data processing, LLM orchestration, and analytical problem-solving skills to high-impact engineering projects.

EDUCATION

B.Tech in Artificial Intelligence and Data Science <i>JCT College of Engineering and Technology, Pichanur</i>	2023-2027
Higher Secondary - Maths Biology <i>Subbiah Vidyalayam Girls H.S.S.Thoothukudi</i>	2021-2023
SSLC <i>Subbiah Vidyalayam Girls H.S.S.Thoothukudi</i>	2021

PROJECTS

AI-Powered Mobile Test Automation Framework

Tools: Python, LangGraph, Appium, Streamlit

- Developed an agentic test platform that translates natural language Excel test suites into autonomous mobile actions.
- Utilized LangGraph to orchestrate state-machine decision pathways (Plan > Execute > Validate > Self-Heal).
- Engineered a self-healing system that parses UI structural XML with an LLM to dynamically fix broken paths on runtime.
- Implemented a hybrid execution model, resolving 95% of tasks deterministically to minimize LLM inference overhead.
- Built a live Streamlit dashboard to monitor execution loops and filter expected vs. actual metric variations.

Excel Sales Dashboard

Tools: Excel, Power Query, Pivot Tables, Slicers

- Built an interactive sales dashboard analyzing retail transactions across 3 cities — Mandalay, Naypyitau, and Yangon.
- Cleaned and transformed raw data using Power Query with 10 automated transformation steps.
- Created 6 chart types including bar, pie, donut, line, and clustered charts.
- Implemented 3 dynamic slicers for Gender, City, and Product Line filtering.
- Built KPI cards tracking ₹3,22,967 total revenue, 5,510 units sold, and ₹15,379 total tax.
- Identified Electronic Accessories as the top-performing product category.

Automated Sales Reporting System

Tools: Excel, Power Query, VBA

- Built a professional Excel workbook following ETL process with automated data cleaning, 3 Pivot Tables, interactive dashboard, and VBA-powered auto change log system recording every data modification with timestamp and cell reference.

Criminal Detection System (Academic Project)

Tools: Python, Machine Learning, OpenCV

- Built an academic machine learning project for pattern recognition from images to support criminal detection protocols.
- Applied foundational data preprocessing and core machine learning workflows for accurate image classification.
- Gained hands-on competency with ML model training phases, feature extractions, and performance evaluation metrics.

INTERNSHIP EXPERIENCE

AI & Data Analytics Intern | Novitech Pvt. Ltd

- Completed 30-day intensive data analytics program covering Excel, Power Query, Statistics, Tableau, Power BI, Python, SQL, and Machine Learning. Built automated sales reporting system with VBA audit trail and interactive dashboards using real-world datasets.

Data Analytics Intern | Pumo Technovation Pvt. Ltd

- Performed end-to-end data analysis using Excel and Python — including data cleaning, EDA, visualization using matplotlib and seaborn, and business insight reporting.

TECHNICAL SKILLS

AI Architecture & Tools	LangGraph, LangChain, LLM Integration (Anthropic, Groq, Sarvam), Appium
Data Analysis	ETL Process, Data Cleaning, EDA
Visualization	Charts, Slicers, KPI Cards, Dashboard
Programming & Libs	Python, pandas, numpy, VBA
Database & BI	SQL, MySQL (basics), Power BI (learning)

CERTIFICATIONS

- Python Programming - Aaron Computer Center
- Python for Data Science - NPTEL
- Cloud Computing - NPTEL

LANGUAGES KNOWN

- Tamil
- English

INTERESTS

- Data Analytics & Business Intelligence
- Data-Driven Problem Solving
